Ohio Crop Weather

June 10, 2013

There were five days suitable for field work in Ohio during the week ending June 9, according to the USDA, NASS, Great Lakes Region. Producers took advantage of the continued warm weather and completed the planting of **corn and oats**, and neared completion of **soybean** planting. Some producers also replanted crops lost due to frost. Nitrogen application to **corn** also moved quickly, with some counties reporting that it was nearly finished. Producers baled **hay**, but many are behind their usual pace due to rain in previous weeks. **Winter wheat** appears to be in good condition, and farmers are preparing equipment for harvest. Some areas received rain this week, while others are hoping rain will come soon to keep soil moisture at adequate levels.

Stratum	Very short	Short	Adequate	Surplus
	Percent	Percent	Percent	Percent
Topsoil	2	12	75	11
Subsoil	2	14	80	4

Crop	Very poor	Poor	Fair	Good	Excellent
	Percent	Percent	Percent	Percent	Percent
All Hay	0	3	24	56	17
Corn	0	2	16	63	19
Oats	0	2	25	66	7
Pasture	0	3	23	56	18
Winter Wheat	0	2	27	55	16

Crop	This week	Last week	Last year	5-year average
	Days	Days	Days	Days
Days Suitable for Fieldwork	5	6	--	--
	Percent	Percent	Percent	Percent
All hay, first cutting	67	52	NA	NA
Corn, planted	100	98	100	95
Corn, emerged	94	75	99	83
Oats, planted	100	100	100	95
Oats, emerged	97	92	100	92
Oats, headed	21	5	68	34
Soybeans, planted	94	89	100	83
Soybeans, emerged	75	58	93	63
Winter wheat, headed	99	86	100	99

Special Note

NASS Survey Update!

In the first two weeks of June, NASS will interview producers and survey tracts of farm land across the United States to gather information that will set the foundation for estimates during the upcoming forecast season. Additionally, we will ask hog producers about their inventories and farrowing intentions for the next six months. The information will help producers, suppliers, traders, buyers, and others make informed business decisions. The results will be available beginning June 28 in the *Acreage* and other reports. **Farmers should watch for their surveys and be sure to respond. Your information matters!**

WEATHER SUMMARY FOR THE WEEK ENDING SUNDAY, JUNE 9¹

Region	Temperature		Precipitation				Growing Degree Days ²			
	Last Week	Dev.	Last Week	Dev.	Since Apr. 1	Dev.	Last Week	Dev.	Since Apr. 1	Dev.
