

Ohio Crop Weather

OH-CW1416

April 4, 2016

Rain replenishes soil and keeps producers out of fields

Most of the State saw heavy precipitation this week, which was welcomed as it replenished soil moisture. There were 1.3 days suitable for fieldwork for the week ending April 3rd according to Cheryl Turner, Ohio State Statistician of the USDA's National Agricultural Statistics Service. Some growers top-dressed wheat, though the majority were holding off due to saturated fields. Some were also applying fertilizer and spraying, though mostly producers focused on prep activities as the rain prevented most fieldwork. Among fruit growers, there were some worries about damage to the peach crop due to snow and freezing.

THIS IS THE FIRST CROP AND WEATHER REPORT FOR THE 2016 SEASON. A SERIES OF WEEKLY CROP PROGRESS REPORTS WILL BE PUBLISHED EACH MONDAY AT 4:00 P.M. EST THROUGHOUT THE CROP SEASON.

These reports will cover planting and harvesting activities, crop development, weather data, and timely crop management information provided by farmers, USDA, and The Ohio State University experts. For the earliest possible access, look for these reports on the internet shortly after the 4:00 P.M. release time.

Soil Moisture: Week Ending 04/03/16

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>
Topsoil moisture	0	2	58	40
Subsoil moisture	0	6	68	26
