Ohio Crop Weather

September 12, 2016

Rains Arrive Before Harvest

Producers are seeing the long term effect of early season drought despite sporadic rainfall received lately, according to Cheryl Turner, Ohio State Statistician with the USDA's National Agricultural Statistics Service. There were 5.7 days available for fieldwork for the week ending September 11th. The week began hot and dry, but many areas accumulated well over two inches of rain by the weekend. However, with **Corn** maturing rapidly, precipitation brought more disease and pest pressure as well as obstacles to harvest. **Soybeans** were better able to benefit from recent rains and are progressing on pace with the five year average. Rains have not fully revived **pastures** in many areas.

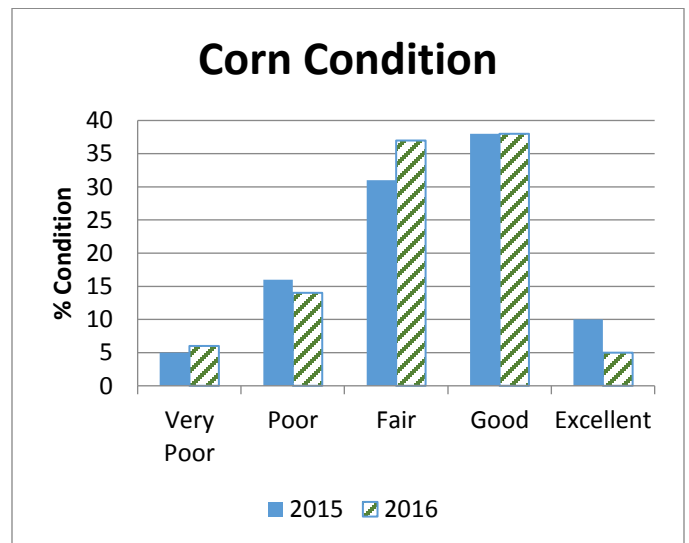

Soil Moisture: Week Ending 09/11/16

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	6	25	63	6
Subsoil moisture	10	26	61	3

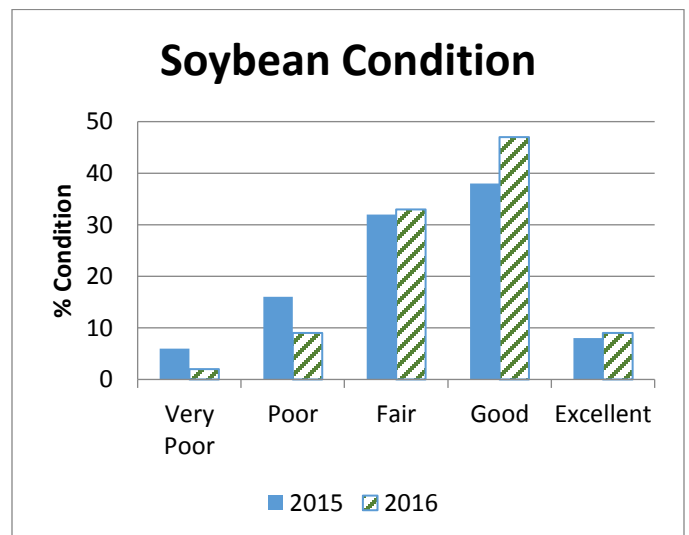

Crop Progress : Week Ending 09/11/16
