Ohio Crop Weather

June 4, 2018

Planting Progress Endures Wet Conditions

Despite wet conditions this week, a lot of the planting was able to be completed, according to Cheryl Turner, Ohio State Statistician with the USDA's National Agricultural Statistics Service. There were 4.3 days suitable for fieldwork in Ohio during the week ending June 3. Wet conditions caused some delay in field work. Some areas could use rain, but others have a surplus. Warm temperatures also continued this week which helped boost crop growth and condition. **Corn** and **soybean** stands are emerging nicely. There were a few reports of replanting. **Oats** planting is complete. **Hay** making was delayed by wet weather. Spraying and side dressing of corn continued this week.

Soil Moisture: Week Ending 06/03/18

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	1	7	71	21
Subsoil moisture	1	5	71	23

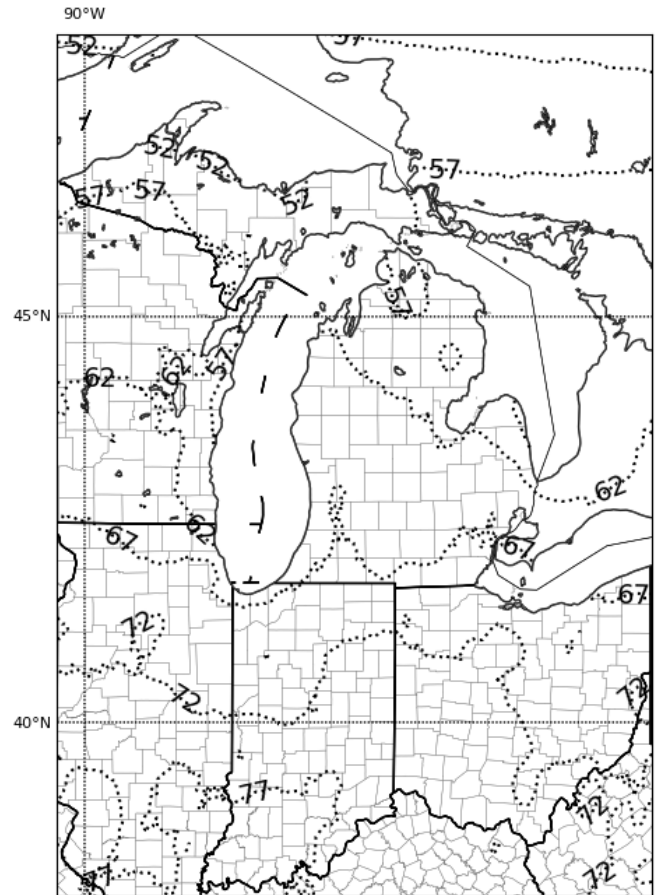

Crop Progress : Week Ending 06/03/18

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year Average

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal. Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees fahrenheit. Climate normals used are for the 1981-2010 period.

Notice: Please be advised, the Weekly Crop Progress and Condition Report's weather station data table may be discontinued for budget reasons. This includes the possibility of discontinuing the weather graphics. Please contact your local NASS Regional Field Office with comments or compliments regarding this issue. Crop progress and condition data will continue to be available in the Weekly Crop Progress and Condition Report.
